THE **PROBLEM**

Improving and Managing enterprise operational excellence

Lifetime Group

Solving the Six experiences Metrics

Customer experience CX	Delight your Customers in the sustainable World
Employee experience EX	EcoOps - Skills visibility, Remote Work engagement
Ownership experience OX	FinOps - Cost visibility
Partnership experience PX	Sourcing Ops - Strategic Sourcing performance
Leadership experience LX	DataOps - Data-driven Leadership excellence
Tooling experience TX	DevOps - GitOps - Operational excellence

Lifetime Group - the Secure Managed Data Partner - You get us. Partners you trust. All Rights Reserved © Lifetime Group 2021 1.06

The cognitive decisioning

Intelligent industries are transitioning to (CXX,) data-driven automated or semi-automated cognitive decisioning.

1. unlocking and building deeper the value of open & business data

through

the applications of powerful data analytics,

data science, and

data products, and

own business functions

based

microservices.

THE **PROBLEM**

6 Corporate Gaps

The Resource and Costs Gap

AI Skills & IT Delivery Gap

Cloud Project delivery gap

Modernisation gap, migration gap, the data integration gap.

The Leadership Gap

Generations XYZ

The Customer experience management CEM gap

Hybrid Cloud Management

HCM & Application Security

ASM Gap CI/CD gap, Devsecops gap

Real Customer Story show **the Problem.** CIOs tells us;
"Our corporate development organization looks like this:

- Dozen of teams involved with mixed culture *no Intelligent Automation*
- Large hundreds of developers stack with DevOps. *Lack of Security in DevOps.*
- There is multiple squads producing multiple applications on hybrid multicloud, and a mix of on-prem and cloud native development *without Management Layer.*
- Loosely coupled, tightly integrated software, which is geographically dispersed in multiple time zones *challenges Ops and Dev especially Sec.*

This led us to the following thought process:
We knew that we couldn't simply react and restore (because of **AI & IT Gap**)
We knew there were lessons to learn from operational experience (because we have **Project Delivery Gap**).
We wanted a continuous feedback loop into our application Development teams (because we face a **Customer experience Gap**).
We wanted improved reliability, operability, scalability and performance of our own software (because we have **HCM Gap)**
We wanted to minimize operational toil (with Digital Workspace Cloud Native)
We wanted to maximize bandwidth for developing and delivering value to our customers. (improving **Bottom Line Revenue & Net Income**)."
Market Opportunity:
Cloud Ready Teams: Finland 53000 man working years, Sweden 105000, Germany 600000; in Europe 1 million engineer man year every year x 100.000 eur. 1 billion eur.
Intelligent Automation, Digital Workforce, Artificial Intelligence: ***70% of Cs has not started.***

THE AI Market Size

Artificial Intelligence on dws3
